

BIRUK HABTE

Full-Stack Developer

Addis Ababa, Ethiopia | 0995871152 | birukhabte2706@gmail.com | github.com/birukhabte | birukbura.vercel.app

SUMMARY

Full-stack developer with a Bachelor's degree in Information Systems and hands-on experience building production-style applications with React, Node.js, Express, and SQL/NoSQL databases. Delivered a full-stack utility management platform and backend APIs during an internship at Qemer Software Technology PLCadd Efuye Gela Tech Company . Comfortable across the stack, from database design to real-time features, authentication, and payment integration. Seeking an entry-level Full-Stack Developer role.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, PHP, Python
Frontend	React, Next.js, React Native, HTML, CSS, Tailwind CSS, Bootstrap
Backend	Node.js, Express.js, NestJS, Laravel, Django
Databases	MongoDB, MySQL, PostgreSQL, Supabase
Tools & Other	Git, Postman, Docker, Redis, Vercel, Netlify, JWT Authentication, RESTful APIs, Socket.io

EXPERIENCE

Backend Developer (Internship) | Qemer Software Technology PLC

Jul 2025 - Aug 2025

- Developed and maintained backend services for an e-commerce platform using Node.js, Express.js, and MongoDB.
- Built secure RESTful APIs for authentication, products, orders, carts, and user management.
- Implemented JWT authentication, role-based access control, and optimized database performance.
- Collaborated with frontend developers to integrate APIs and deliver scalable, high-performance applications.

Technologies: Node.js, Express.js, MongoDB, Mongoose, React, JWT, REST APIs, Git, Postman

Full-Stack Developer Intern | Efuye Gela

Sep 2024 - Jan 2025

- Developed and maintained full-stack web applications using Next.js, Express.js, and Supabase.
- Built and integrated secure RESTful APIs, authentication, and database operations with Supabase PostgreSQL.
- Implemented pagination, database indexing, and caching strategies to improve query efficiency and application performance.
- Optimized backend services by reducing response times and improving scalability through efficient database queries and API performance tuning.
- Collaborated with senior developers on feature development, bug fixes, code reviews, testing, and version control using Git.

Technologies: Next.js, React, Node.js, Express.js, Supabase, PostgreSQL, TypeScript, Git

PROJECTS

School Management System | Private Client

- Developed a full-stack School Management System for Ethiopian schools with dedicated Admin, Teacher, Student, and Parent web portals.
- Built secure RESTful APIs with JWT authentication, role-based access control (RBAC), real-time communication, and file upload capabilities.
- Developed modules for student registration, attendance, examinations, grade management, fee collection, payroll, communication, and reporting.
- Integrated the Chapa payment gateway, PDF report generation, real-time notifications, Redis caching, and Docker-based deployment.

Technologies: Node.js, Express.js, TypeScript, Prisma ORM, MySQL, Next.js, React, Tailwind CSS, Material UI, Socket.IO, Redis, JWT, Docker, Swagger, Chapa API

PharmaCare - Pharmacy Management System | Personal Project

- Designed and developed a full-stack Pharmacy Management System to streamline medicine inventory, sales, purchases, prescriptions, customer management, and supplier management.
- Built secure RESTful APIs and implemented role-based access control (RBAC) for Head Pharmacist, Counter Staff, and Inventory Manager.

- Implemented inventory management with batch tracking, expiry alerts, purchase order processing, and audit logging.
- Developed an interactive dashboard with real-time sales analytics, top-selling medicines, key performance indicators (KPIs), and notifications.

Technologies: *Next.js 14, React 19, TypeScript, Node.js, Express.js, MongoDB, Mongoose, Vercel, Render*

PowerLink Ethiopia - Full-Stack Electrical Utility Management System | *Personal Project*

- Engineered a scalable full-stack platform using Node.js, Express.js, PostgreSQL, React, and React Native to modernize electrical utility service management.
- Implemented Role-Based Access Control (RBAC) for five user roles: Admin, Customer, Business, Supervisor, and Technician.
- Developed modules for service requests, new electricity connections, outage management, customer profiles, announcements, and administrative dashboards.
- Integrated Socket.io for real-time chat and notifications, JWT authentication with bcryptjs, secure file uploads with Multer, email notifications with Nodemailer, and online payments through the Chapa Payment Gateway.
- Designed a scalable backend architecture with PostgreSQL, Docker-ready deployment, and Supabase migration support for maintainability and performance.

Technologies: *Node.js, Express.js, PostgreSQL, React, React Native, Socket.io, JWT, Docker, Supabase*

Car Rental Management System | *Academic Project*

- Designed and developed a full-stack Car Rental Management System using PHP, MySQL, HTML, CSS, JavaScript, and Bootstrap.
- Designed the database through conceptual, logical, and physical modeling, applying normalization up to Third Normal Form (3NF) to ensure data integrity and reduce redundancy.
- Developed modules for vehicle management, customer registration, booking, rental processing, and payment records.
- Built secure CRUD operations, user authentication, and responsive user interfaces.
- Collaborated with team members across the full software development lifecycle, from requirements analysis to testing and deployment.

Technologies: *PHP, MySQL, HTML, CSS, JavaScript, Bootstrap*

EDUCATION

Bachelor of Science in Information Systems

Addis Ababa University | 2026
