

BIRUK HABTE

Senior Full-Stack Engineer

biruk.habte-ug@aau.edu.et • +251 995 871 152 • Addis Ababa, Ethiopia Portfolio @Ethio_Coders_channel

PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with around 4 years of progressive experience designing, building, and scaling enterprise-grade web applications. Proven track record delivering secure, high-performance systems across fintech, SaaS, and digital product companies using **Node.js, React/Next.js, NestJS, Laravel, and cloud-native tooling**. Deep expertise in distributed architecture, RESTful and GraphQL APIs, database optimization, and DevOps workflows. Founded Ethio Coders — a 5,000+ member developer community — demonstrating technical thought leadership and a commitment to growing the engineering ecosystem.

PROFESSIONAL EXPERIENCE

Software Developer · Kuraz Technologies PLC

02/2023 – 08/2023 | Addis Ababa

- Developed and maintained full-stack web applications using **React.js, Next.js, Node.js**, and **PostgreSQL** within a **microservices architecture**.
- Led end-to-end database design: gathered data requirements, built the **conceptual → logical → physical** data models.
- Applied **normalization** (up to 3NF), and implemented indexing to balance integrity with query performance.
- Designed secure **RESTful APIs** with **JWT** authentication and **RBAC**, following **OWASP** security guidelines and secure coding best practices.
- Optimized application performance via **Redis caching** and PostgreSQL query tuning, achieving measurable reductions in server load.
- Supported **Docker**-based deployment pipelines and **PM2** process management within **CI/CD workflows**.

Backend Developer · Qemer Software Technology PLC

10/2023 – 06/2024 | Addis Ababa

- Built scalable **MERN-stack** RESTful APIs handling high-concurrency workloads, with **Redis caching** improving average API response time by 35%.
- Designed **MongoDB** schemas with optimized indexing and aggregation pipelines for efficient data retrieval across large datasets.
- Developed JWT-based authentication and integrated multiple **third-party APIs** including **Chapa and Telebirr and notification services**.
- Partnered with frontend React developers to deliver seamless full-stack features with minimal integration friction.

Full-Stack Developer · Gasha Digital Technologies

07/2024 – 02/2025 | Addis Ababa

- Built and maintained full-stack web applications end-to-end with **Next.js** and **Node.js**, delivering SSR-powered pages for faster load times and improved SEO.
- Designed and implemented relational database schemas using **Prisma ORM** and **MySQL**, applying indexing strategies that reduced critical query latency .
- Optimized data delivery with **Next.js caching**, cutting redundant database queries by and improving API throughput under peak load.
- Improved large-dataset performance through **query optimization**, **pagination**, and **lazy loading**, reducing initial page load and over-fetching.
- Developed and consumed **RESTful APIs**, integrating Next.js components with backend services for seamless data flow.
- Implemented **RBAC** and secure authentication flows, protecting sensitive application data across multiple user roles.
- Built responsive, accessible UIs with React and Tailwind CSS, translating design mockups into production-ready components.
- Maintained Git-based CI/CD workflows and collaborated in an agile team to ship features on schedule.

Senior Full-Stack Developer · Farka Digital Technologies

02/2025 – 03/2026 | Addis Ababa

- Architected and delivered enterprise web applications with **NestJS**, **React**, and **TypeScript** through async processing and query optimization.
- Designed and enforced **Zod schema validation** across all API boundaries, eliminating a class of runtime type errors and improving data reliability.
- Defined API standards and architecture conventions adopted across the engineering team, improving consistency and maintainability.
- **Mentored** 2–3 junior developers through code reviews and pair programming, raising code quality and delivery speed.
- Led adoption of **Redux Toolkit** for centralized state management, reducing state-related bugs across complex multi-user workflows.
- Built a reusable, accessible UI component library adopted across 4 product modules, accelerating new-feature development and ensuring design consistency.
- Championed **Docker containerization**, standardizing dev/staging/production parity and reducing environment-related deployment issues to near zero.
- Collaborated directly with designers and product owners to translate business requirements into scalable technical solutions.

- Delivered custom web applications for private clients using **Laravel, React, Node.js**, and **TypeScript**, consistently meeting deadlines and exceeding client expectations.
- Designed backend systems with secure authentication, role-based access, and third-party API integrations including payment and notification services.
- Managed full project lifecycle from requirements gathering and architecture design through deployment and post-launch support.
- Built responsive, accessible **UIs** using **React/Next.js** tailored to specific business requirements.

TECHNICAL SKILLS

Frontend	JavaScript / TypeScript, React, Next.js, Redux Toolkit, Tailwind CSS, HTML5 / CSS3, Zod
Backend	Node.js / Express, NestJS, Laravel, Python / FastAPI, RESTful APIs, GraphQL, Prisma ORM
Databases	PostgreSQL, MySQL, MongoDB, Redis, Supabase, SQLite, Firebase
DevOps	Docker, CI/CD, Git & GitHub, PM2, Supabase, Vercel
Architecture	Microservices, Clean Architecture, SOLID, CQRS, Domain-Driven Design, TDD, Agile/Scrum
Security	JWT, RBAC, OWASP, Input Validation, Secure Coding Practices

EDUCATION

B.Sc. Information Systems — Addis Ababa University

2024

LANGUAGES

Amharic (Native)

English (Proficient)
