

Biruk Habte

Fullstack Developer

biruk.habte-ug@aau.edu.et • 0995871152 • Addis Ababa, Ethiopia • [LinkedIn](#) • [Portfolio](#) • [@Ethio Coders channel](#)

About Me

Experienced full-stack developer building scalable, performant and robust web applications utilizing **JavaScript/TypeScript, React, Next.js, Node.js, Laravel** and **Python**. My background includes the development of secure backends, **RESTful APIs** and modern responsive UIs that are clean and maintainable. I also founded the Ethio Coders Telegram community (@Ethio_Coders_channel) to support 5,000+ developers through knowledge sharing. My goal is to solve meaningful problems through reliable software, grow my technical abilities, and help other developers do the same.

Professional Experience

Junior Full Stack Developer (Internship) · [SWENETIX TECH](#)

01/2024 – 03/2024 | Addis Ababa

- Developed dynamic and responsive web applications using **TypeScript** and **PHP**.
- Created user interfaces and wrote back-end code; developed and integrated APIs.
- Collaborated with a group of developers on real-world applications and projects.
- Gained valuable experience in full-stack web development through hands-on project work.

Backend Developer · [Qemer Software Technology PLC](#)

09/2024 – 01/2025 | Addis Ababa

- Worked as a Backend Developer specializing in the **MERN stack**, building scalable **RESTful APIs** and handling server-side logic.
- Designed and managed **MongoDB** databases, ensuring efficient data modeling, security, and optimization.
- Developed robust backend services using **Node.js** and **Express.js**, implemented authentication systems, and integrated third-party APIs.
- Collaborated closely with frontend developers using **React** to deliver seamless full-stack solutions.
- Focused on debugging, performance tuning, and maintaining clean, maintainable code.

Full Stack Developer · [Gasha Digital Technologies](#)

06/2025 – 11/2025 | Addis Ababa

- Built backend logic and designed relational database schemas using **Next.js, Node.js, Prisma ORM**, and **MySQL**.
- Implemented secure user authentication and role-based access control (RBAC) to protect application data.
- Developed and integrated RESTful APIs and leveraged server-side rendering (SSR) to improve performance and SEO.
- Optimized application performance, maintainability, and scalability by following clean code and software engineering best practices.
- Managed source code with **Git** and collaborated effectively within an agile development environment.

Full Stack Developer (Remote & Freelance / Private Clients) · [Self-Employed](#)

05/2024 – Present | Remote

- Develop and maintain full-stack web applications using **Laravel, React, Node.js**, and **TypeScript**.
- Design and implement **RESTful APIs** to enable seamless front-end and back-end communication.
- Build custom web solutions for private clients based on specific business requirements.
- Develop responsive, user-friendly interfaces using **React/Next.js**.
- Implement secure back-end systems including database design, authentication, and authorization.
- Integrate third-party services such as payment gateways, notifications, and external APIs.

- Optimize application performance, troubleshoot existing systems, and deliver projects on time.

Education

Bachelor of Science in Information Systems

Addis Ababa University | 2022 – 2025

Skills

Frontend

- JavaScript / TypeScript
- React / Next.js
- HTML5 / CSS3
- Tailwind CSS

Backend

- Python / FastAPI
- Node.js / Express
- Nest.js / Prisma
- RESTful & GraphQL APIs
- Supabase / Firebase

Cloud & DevOps

- Docker
- CI/CD
- Git & GitHub

Methodologies

- Agile / Scrum
- TDD
- Scalable Architecture
- Clean & Maintainable Code

Strengths

Problem-solving • Rapid prototyping • Cross-functional collaboration • User-focused solutions • Continuous learning

Languages

Amharic (Native) • English (Proficient) • Afaan Oromo (Fluent)
